

# Enzymedica Virastop™ - 120 Caps

**Virastop** contains the highest available potency of an exclusive blend of proteases to assist the body in purification. **Protease** can break down undigested protein, cellular debris and assist in the break down of toxins in the blood, sparing the immune system this task. The immune system can then concentrate its full action on the invasion.\*

Component Benefits: Oral proteases taken on an empty stomach have been shown to be absorbed and carried into the blood stream where they are bound to Alpha II (Alpha-II-macroglobulin). Recent research has indicated that oral proteases bound to the Alpha II break down (digest) protein pathogens in the blood. This includes, but is not limited to viruses, fungal forms (such as candida), bacteria and parasites.\*

**Viruses** are cell parasites consisting of nucleic acids covered by a protein film. The introduction of oral proteases, presents the ability of those enzymes to act upon the protein coating of the viruses. Enzymes can also break down undigested food protein, cellular debris, and toxins in the blood, sparing the immune system this task. The immune system can then concentrate its full action on the viral, bacterial, fungal, or parasitic invasion.\*

For the above reasons **Virastop** is a unique product. It is not an “immune stimulator”, rather an “immune balancer.” It contains a blend of eight **proteases**, which has the potential of becoming part of the immune system when taken on an empty stomach.\*

## Benefits and Usage

**Virastop™** contains a high potency, exclusive blend of proteases enzymes to support the immune system. Virastop contains eight different proteases which can break down undigested protein, cellular debris, and toxins in the blood. Protease is able to dissolve almost all proteins as long as they are not components of living cells. For a protease enzyme to digest proteins they have to be attached to a dead organism, damaged, or be a protein that does not belong in the body. For example, parasites, fungal forms, and bacteria are made up of protein.

**Suggested Use:** For maintenance – 1 capsule, twice a day, 1 hour before or 2 hours after a meal (empty stomach). For therapeutic purposes Virastop should be taken 3-4 times per day. More capsules may be added as needed.

If at any time you feel discomfort, take 2 capsules of **Acid Soothe**. For support, continue to take **Acid Soothe** with your **Virastop** or Digest with meals and when needed.

**Nutritional Information**

**Serving Size:** 1 capsule  
**Capsules Per Container:** 60 & 120

**Amount Per Capsule:**

Protease <i>Thera-blend</i>	150,000 HUT
Mucolase	8 mg
Catalase	50 Baker
Serratiopeptidase	25,000 SPU
Nattokinase NSK-SD	400 FU
Mineral Blend	32mg

**This product contain(s) no fillers.**
